2021 - 2024

SKILLS

Languages: C, C++, Java, Javascript, Typescript

Engineering: Data Structures, 500+ Leetcode, Full-Stack (MERN)

Tools: Git, Github, Postman, Figma

Personal Projects

Nexor - A Shoe Website:

I created this website to learn about the 3d models on website and created it with interactive UI with features like add to cart, tax, delivery etc. Used React, Framer-motion, Redux etc.

Crypto Pulse:

A real-time crypto currency tracker with API integration, offering up-to-date coin prices, market trends, and exchange data in a responsive, user-friendly UI.

Fluidframes:

I created this website after learning GSAP and Framer Motion. The main focus behind building this website was to apply my animation skills and create something visually pleasing that evokes a "Wow, what an interaction!" experience.

Experience

Internal Smart India Hackathon 2025

Selected in the internal Smart India Hackathon (SIH 2025) round for developing AgriGURU, an AI-powered agriculture platform under the theme Agriculture, FoodTech & Rural Development.

SEO Executive – Infinity Learn, May 2023 - Mar 2025:

Played a key role in scaling overall website traffic from 2M to 7.7M as part of the team. Independently grew the subfolder "Topics" from scratch, achieving 1.4M traffic with 100k keywords in SERP.

Led blog migration to Next.js, optimizing SEO and performance. Improved accessibility with optimized HTML structure and metadata.

Certificates

C++ by Abdul Bari, **Full Stack Web Development** by Colt Steel
